

GRENADE LAUNCHER

SPECS

MODEL	M203
CALIBER	40 MM
OPERATION	SINGLE SHOT / BREECH LOADED
SIGHTS	LEAF OR QUADRANT
FINISH	MIL-SPEC ANODIZED ALUMINUM
BARREL	7", 9", OR 12"
RIFLING	1:48" / 1,219 MM RH TWIST
BREECH OPENING	543" / 138 MM
EFFECTIVE RANGE	375M (7"), 400M (9"), 425M (12")
FIRE CONTROL	FIRE / SAFE SWITCH
MAINTENANCE	FIELD STRIPS WITH NO SPECIAL TOOLS

LMT® has been manufacturing grenade launchers and their parts for over 35 years and in that time, we've established ourselves as one of the world's foremost suppliers of the M203. In 2010 we recognized the modern military transition to quad rail forends and designed one of the only grenade launchers in the world that can mount directly to one. We took that a step further in 2018 with the "Shorty 40", a launcher capable of stand-alone implementation or attachment to an SBR or even an AK-47. If there's one term that defines LMT® it's modularity; our grenade launchers and their accessories are exceptionally versatile systems useful for lethal and nonlethal operations.

OVERVIEW

MODEL

L2X	L2B	LMP300
		

The L2X, or as we call it "Shorty 40", is our rail mounted grenade launcher with a 7" barrel. This little guy can be weapon mounted even on SBRs or used as a standalone weapon for grenades, flares, or door breaching.

The ideal modern grenade launcher, the L2B provides the same force multiplier as the LMP300E; however, it can be mounted on the underside of a 1913 picatinny rail or employed as a standalone launcher with our frame assemblies.

The most recognizable of our offerings, the LMP300E is the same grenade launcher employed for decades by militaries around the world. It attaches directly to an M4/M16 series rifle via the barrel and slip ring. We've even designed a standalone platform for it.

ISO 9001:2015 Registered. Our products are manufactured in compliance with the Berry Amendment.

L2X

The table and graphics provided here illustrate just how modular our grenade launcher platforms can be.

L2X stands alone as its own proprietary system with a frame tailor fit to its unique size. It also uses our Professional Defense Weapon (PDW) stock and extension. The pistol configuration fits conveniently in a backpack or holster for quick-draw usage without the need to mount on a weapon system.

L2B

The L2B system will accept the 9" or 12" M203 barrel. This system is equal to the LMP300 in operational effectiveness; however, its design allows it to be rail mounted. This is a perfect companion to our monolithic one-piece upper receivers, allowing operators to quickly add or remove a launcher to suit the mission at hand.

LMP300

LMP300 can act as a stand-alone launcher or install to an M4/M16 series rifle by either wired mounting bracket or a quick-detach assembly (14.5" and 16" barrel)
